

# langmuir

- A - surfactant, micelle, solution, aqueous, phase, sodium, system, cationic, nonionic, micellar
- B - surface, self-assembled monolayers, gold, au, monolayer, microscopy, electrode, film, silicon, electrochemical
- C - emulsion, suspension, silica, latex, dispersion, colloid, pickering, colloidal particle, sphere, crystal
- D - droplet, drop, liquid, wetting, superhydrophobic surface, contact angle, dynamic, water, evaporation, wet
- E - synthesis, gold nanoparticles, nanoparticle, nanorods, preparation, silver nanoparticles, au, magnetic, ligand, metal
- F - surface, polymer brush, protein adsorption, zwitterionic, ethylene glycol, poly ethylene, copolymer, peptide, antifouling, interaction
- G - air-water interface, langmuir-blodgett film, monolayer, air/water interface, acid, langmuir monolayers, lipid, langmuir-blodgett-films, molecular...
- H - adsorption, pore, mesoporous, simulation, activated carbon, silica, porous, material, zeolite, framework
- I - polyelectrolyte multilayers, multilayer film, graphene, layer-by-layer assembly, poly, thin film, polyelectrolyte multilayer, cellulose, layer, n...
- Others
